GBA ST2

The popular Global Bill Acceptor, GBA, is a widely distributed and accepted bank note reader, which is renowned for its simplicity, reliability and capacity to accept a wide range of world currencies. The powerful GBA note reader can operate as a standalone, stackerless unit. However, there are integrated stacker options available, to meet particular note storage requirements.

As a result of continual and vigorous product improvement programs, the GBA product range remains at the forefront of BNR technology. In keeping with this mission, the GBA ST2 introduces a new dimension to the range of GBA bank note validators.

The GBA ST2 is immediately robust and reliable, both in terms of its sturdy, compact housing, excellent and innovative "Sense Technology" note validation and range of clip-on mounting bezels.

Key features:

- A wide range of interfaces including : Parallel, Pulse, Serial, SSP, MDB, ccTalk.
- Accepts up to 32 notes, in 4 directions (max note width 85mm)
- Illuminated, blue flashing note guide as standard
- USB download capabilities
- Optional magnetic head
- Optional coupon/barcode reader
- Comprehensive GBA Talk software support package
- Range of stylish "clip-on" bezels to suit a variety of applications
- Removable upper housing for complete access to the internal note path.

The GBA ST2 has wide ranging applications in markets as diverse as carwash change machines to kiosks to specialised AWP solutions.

Support

Backed by dedicated teams of research and development engineers, sales professionals and support staff, the GBA product is our commitment to a vision of product excellence and customer satisfaction.

The Company

Astrosys International Ltd specialises in the design, manufacture and distribution of the Microcoin coin validator and GBA bank note reader. It supports its products with ISO9001 certified manufacturing plants and an international network of offices and market representation in Australia, Hong Kong, the United Kingdom and the USA.
