

Using intelligence to unlock the cash in your machines and increase your *profitability*

- **Acceptance and Security**

The MEI CASHFLOW™ 7000 incorporates market leading discrimination technology to ensure the highest level of valid coin acceptance

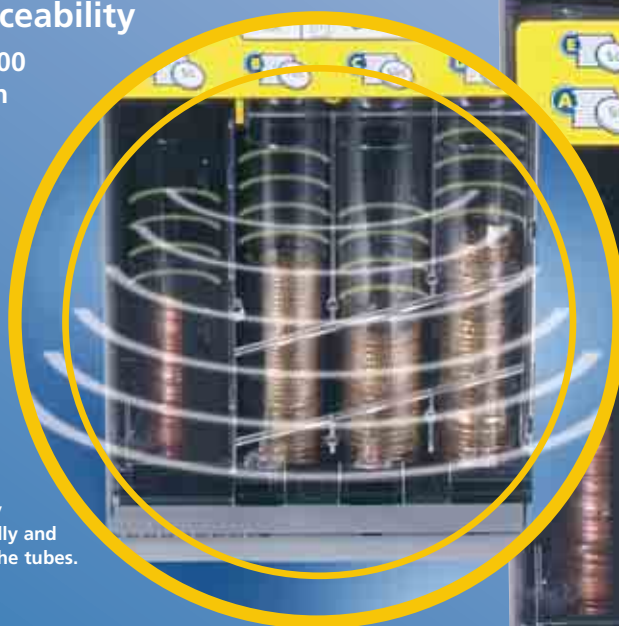

- **Coin management**

Whether you choose to leave the MEI CASHFLOW™ 7000 in stand alone mode or customize its configuration it will constantly work on your behalf to offer your customers change whilst minimising the cash tied up in your machine.

- **Reliability and Serviceability**

The MEI CASHFLOW™ 7000 builds on MEI's reputation for reliability and with a fully accessible coin path and clear diagnostics via a large display any problems that might arise can be easily corrected in the field with the minimum of training.

Sonar technology accurately monitors coins filled manually and the exact value of coins in the tubes.

With the highest coin capacity in the market and five active tubes the MEI CASHFLOW™ 7000 virtually eliminates exact change situations on even the most demanding sites. However, by constantly monitoring the coin flow it can also work to reduce the cash tied up in tubes where the vend price or throughput allows a more efficient level in each tube, even advising on a more suitable tube configuration when appropriate.

Technical Specification

Interfaces		
Model No.	Machine Interfaces Supported	MDB Peripheral Interface Available
CASHFLOW™ 7900	MDB and Exec or BDV	Yes
CASHFLOW™ 7400 (no display)	MDB or Exec	No

Power Requirements

- 24VDC (BDV)
- 24VAC (Executive)
- 34VDC (MDB)

Accessories

- Audit hardware, Irda or printer options
- MDB Peripheral

Coin Sets

- Euro

Support Tools

On product support through key pad and display. Compatible with CashFlow Programming module

Dimensions

H: 371mm W: 138mm D: 80mm

Why choose MEI?

MEI has focused continuously on the needs of the vending industry for the last 30 years; this industry has seen innovation, invention and dedication passed from MEI to the vending world.

MEI is one of the largest manufacturers of electronic coin change givers, bill acceptors, cashless payment systems and other unattended transaction systems. Over a billion transactions are made every week in 90 different countries using products from MEI.
